Sivi — AI Career Agent

Build better CVs. Find better jobs.
Nail interviews — all in chat.

Founder: **Inoyatullo Musayev**

Problem Statement

Problem 01: Poor resume quality

Candidates don’t know how to write effective CVs or present themselves.

Problem 02: Jobs are scattered across job sites, platforms and Telegram channels

Candidates miss relevant opportunities.

Problem 03: No fast, actionable interview feedback

Candidates don’t know why they get rejected.

Problem 04: Local platforms are fragmented

HH recommendation quality, job boards, Telegram noise, LinkedIn complexity.

The Solution

- AI career agent that analyzes resumes and identifies gaps
- Personalized recommendations: resume fixes, interview prep, skill-building courses
- Job aggregation from boards, company sites, and Telegram
- Telegram-first for instant adoption; app and web follow

Product (features)

Resume & Skill Intelligence

- AI analyzes CVs to detect weak sections, missing keywords, and skill gaps.
- Resume rewriting + actionable improvement suggestions.
- Personalized course recommendations based on resume + target role.

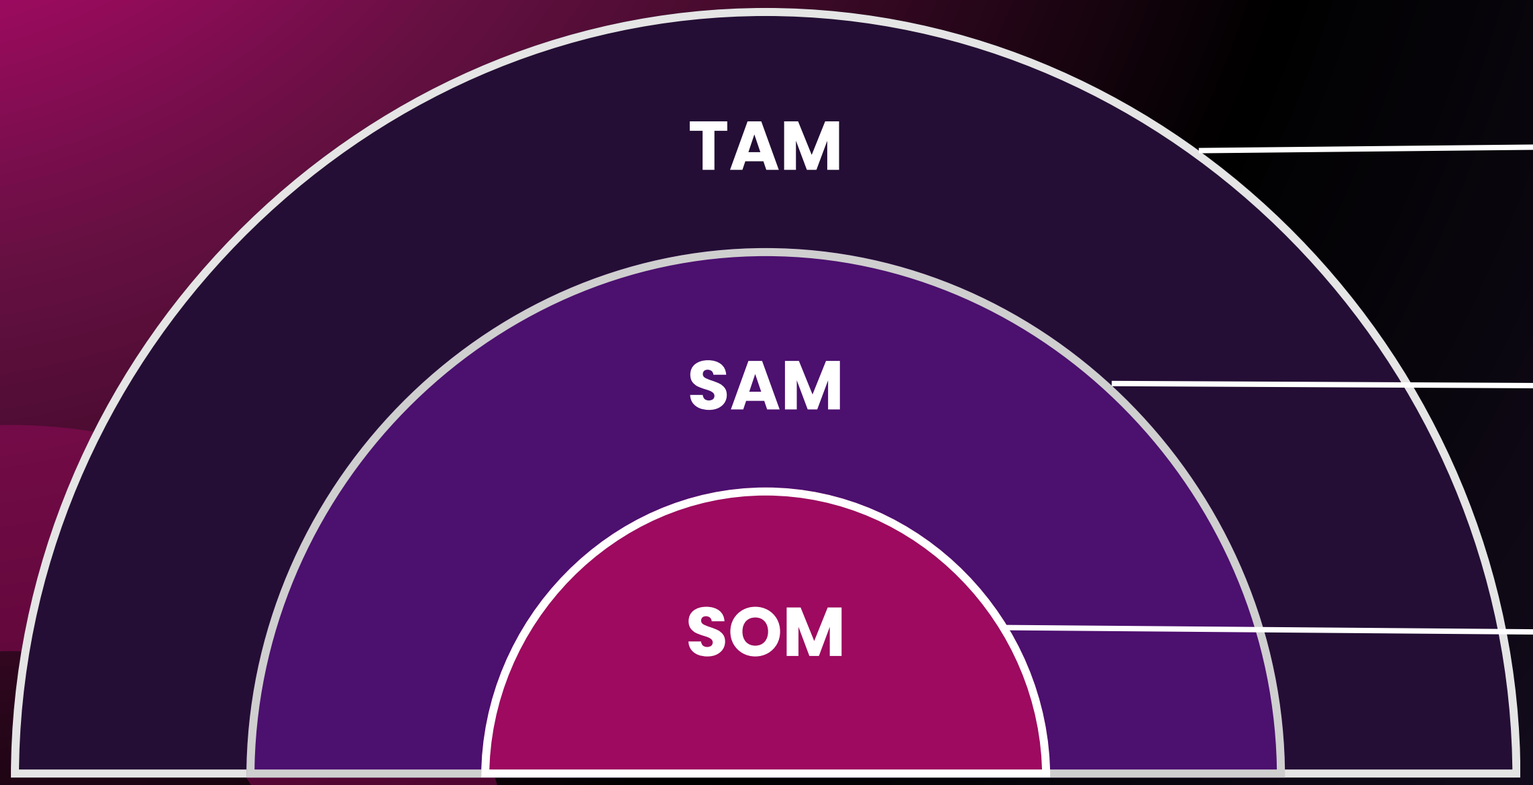
Interview & Career Prep

- AI-generated interview questions tailored to weak areas.
- Detailed feedback, scoring, and improvement tracking.

Job Discovery

- Multi-source vacancy aggregation (job boards, websites, Telegram).
- Smart matching based on skills, experience, and career goals.

Market Opportunity



450M - Global

Active job-seekers
